

# 2-DAY WORKSHOPS

# Future-Focused Learning

## Ten Essential Shifts of Everyday Practice

*Presenter: Lee Watanabe-Crockett*

**November 19–20**

**Richmond, British Columbia**

## Prepare your students to succeed beyond the classroom

Today's students will inherit a legacy of global challenges that we see and read about each day, along with new challenges that we cannot yet imagine. But K–12 educators can prepare this generation to overcome these obstacles now, in classrooms. In this workshop, participants will learn how to foster ethical and responsible global digital citizens who take positive action and solve problems that matter.

- Learn ten shifts of practice—activities that transform teaching and learning at the classroom level.
- Explore how these shifts and smaller micro-shifts can provide exciting challenges for your learners and transform your practice.
- Discover how to implement science, technology, engineering, and mathematics (STEM) learning, inquiry-based learning, and project-based learning.
- Learn best practices for essential questions, personalized learning, higher-order tasks, making learning intentions clear, and mindful assessment.
- Discover how these shifts form a self-directed plan for meaningful and consistent professional growth.
